

## Pruning shrubs and deadheading flowers with confidence

Tessa has a special interest in the pruning and maintenance of shrubs and the deadheading of perennials and annuals for re-bloom and will be speaking on this topic at the upcoming Caudatowa Garden Club fundraiser, “The Curious Gardener” lecture series.

She hopes to take all the fear out of pruning by teaching the fundamentals – and sharing all the knowledge she has learned in the classroom and from practical experience in the many gardens she maintains.

Attendees should bring their hand bypass pruners to the lecture, as they will be putting some of the pruning principles into practice.
